The C Language is developed by Dennis Ritchie for creating system applications that directly interact with the hardware devices such as drivers, kernels, etc.

C programming is considered as the base for other programming languages, that is why it is known as mother language.

```c
#include<stdio.h>

int main(){
    printf("Hello Programming Lover");
return 0;
}
```

It can be defined by the following ways:

Mother language
System programming language
Procedure-oriented programming language
Structured programming language
Mid-level programming language

It can be defined by the following ways:

Mother language
System programming language
Procedure-oriented programming language
Structured programming language
Mid-level programming language
